SIF JAKOBS DIAMOND COLLECTION

SHINE BRIGHT WITH DIAMONDS

Sif Jakobs believes every woman deserves to shine. Our new Diamond Collection celebrates this with diamonds that are not only visually stunning but ethically sourced and carefully crafted.

The collection is made from 14k yellow gold or 14k white gold and diamonds.

Our factory has obtained the prestigious certificate from the Responsible Jewellery Council, assuring you that each piece is created with care for both the environment and the skilled craftsmen who craft them.

*"For a long time, it has been a dream of mine to create a diamond collection.
I've always wanted to offer diamonds that sparkle beautifully and
are created with care for the world around us. Now, with our first-ever
Diamond Collection, that dream has come true!"*

*We've created nine unique collections, from timeless classics to elegant statement pieces,
perfect for those special moments. Each piece is designed to celebrate the elegance
and individuality of every woman, using ethically sourced lab-grown diamonds.*

*I hope you love these collections as much as we do and that they
bring a touch of sparkle to your everyday life."*

TW G-H VS lab-grown diamonds

LAB-GROWN DIAMONDS

Lab-grown diamonds are 100% real diamonds, created in controlled environments and share the same durability and brilliance as natural diamonds.

They are optically, chemically and physically identical to mined diamonds but are created in a lab. Using advanced technology, we replicate the natural process of diamond formation, bringing you diamonds that are just as brilliant and beautiful, only more sustainable.

CRAFTED WITH PRECISION

Each piece in the Diamond Collection is made from 14k yellow or 14k white gold with a polished surface, hand-set with round brilliant-cut and marquise-cut lab-grown diamonds.

These diamonds are TW G-H colour and VS clarity, offering a stunning sparkle that catches the light beautifully and enhances your natural beauty. Top Wesselton is a term used for the colour grading of near-colourless diamonds, specifically in the G-H range.

G-H colour means they are close to colourless, allowing for maximum brilliance. VS clarity indicates minimal/no imperfections visible to the naked eye, ensuring the diamond looks clear and radiant. Each diamond is cut and polished to ensure maximum brilliance.

SUSTAINABILITY MEETS ELEGANCE

Our lab-grown diamonds are created using renewable energy, reducing their carbon footprint.

This is luxury you can feel good about, beauty and brilliance without compromise.

Lab-grown diamonds have a much smaller environmental footprint, requiring less energy and water than mining, and are often considered a more ethical option due to their conflict-free nature.

Shine Bright with Diamonds

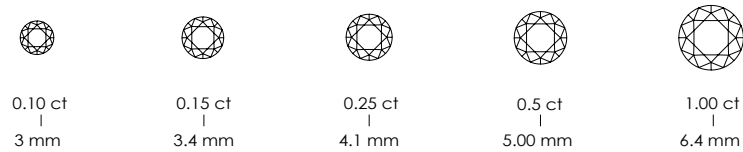

HELD TO THE HIGHEST STANDARDS: THE 4Cs

Like all fine diamonds, our lab-grown diamonds are evaluated by the 4Cs: cut, clarity, colour, and carat. The 4Cs are the key factors that determine the quality and value of a diamond:

Our factory has obtained the prestigious certificate from the Responsible Jewellery Council, assuring you that each piece is created with care for both the environment and the skilled craftsmen who craft them.

CARAT

Measures the weight of a diamond.

COLOUR

Evaluates the presence of colour in a diamond.
The scale ranges from D (colourless) to Z (light yellow or brown).
All our diamonds are near to colourless, rated G-H colour.

Sif Jakobs Lab-Grown Diamonds
Near colourless to the naked eye

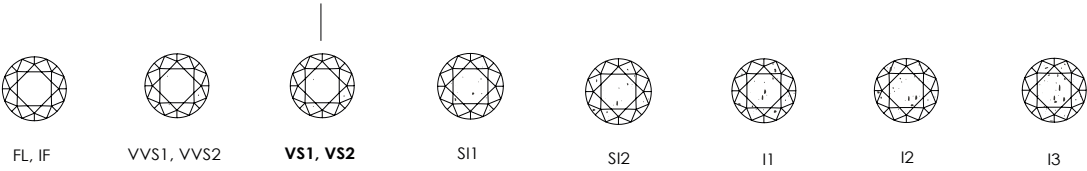

Colour	Colour Definition	Grade
	Colourless	D, E, F
	Near Colourless	G, H, I, J
	Faint Colour	K, L, M
	Very Light Colour	N, O, P, Q, R
	Light Colour	S, T, U, V, W, X, Y, Z

GIA Colour Grading Scale

CLARITY

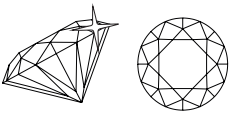

Diamond clarity refers to the presence of inclusions or blemishes in a diamond.
Clarity is graded from flawless (no imperfections) to included (visible imperfections).
Sif Jakobs Diamonds are VS quality.

Sif Jakobs Lab-Grown Diamonds
minimal/no imperfections visible to the naked eye

CUT

Refers to how well a diamond has been shaped and faceted.
A good cut enhances the diamond's sparkle and brilliance.

Every Diamond Is Unique, So Are You!
